## Why a lead free faucet?

New legislation in California and Vermont now restricts the amount of lead allowed in fixtures used to convey water used for drinking and cooking.

Many other states are sure to follow the lead free requirements. LDR, a leader in the manufacturing of plumbing products, introduces a line of lead free faucets for the kitchen and bath that are certified under IAPMO to AB 1953 standards. The faucet construction ensures that water will not come in contact with any lead or other harmful materials. No lead plus style and beauty make LDR faucets a product your customers will love.

When it comes time to buy a lead free faucet, select one from a company trusted by many for years. Choose an LDR faucet.

- ©2010 LDR Lead Free Faucets
- Product mix subject to change
- LDR does not sell to the public
- All faucets covered by a Lifetime Limited warranty
